# MaaS360 from 02

### O<sub>2</sub> business

### Mobiles and tablets. Securely managed. Wherever they are. Whoever they're with.

Do you and your team use your own mobiles and tablets at work? Do you worry about the security risks? Flexibility often goes hand in hand with network security lapses, not to mention the problems caused by lost or stolen devices. It's a modern day reality. But from today, thanks to MaaS360 from O2, this doesn't have to be the case for your business.

Working with our partner, IBM, we can offer you a cloud-based Mobile Device Management solution that puts device security in your hands. It's a simple and comprehensive way of managing all the mobiles, tablets and laptops connecting to your network. Wherever they are. Whoever they belong to.

### Features:

- · Fast enrollment of mobile devices.
- Send enrollment requests over-the-air using message services, email or a custom URL.
- Initiate individual or bulk device enrollments.
- Integrate with Microsoft Exchange and Office 365, IBM Lotus Notes® and other systems.
- Centralized management.
- Configure email, calendar, contacts, Wi-Fi and VPN profiles.
